Promoting Woodland Wildlife Stewardship

A Woodland Wildlife Management Program for Private Landowners

WI Coverts Project Workshops:
August 9-12, 2012
August 23-26, 2012

Woodruff, WI:

Covert: A 14th century English word describing a dense thicket that provides shelter for wildlife.

Sponsored by:

- The Ruffed Grouse Society
- Louisiana-Pacific Corporation
- University of Wisconsin - Extension
- UW-Madison, Department of Forest and Wildlife Ecology
- Sustainable Forestry Initiative Inc.
- The Anne and Jason Spaeth Family
- Braun Woodlands

The Coverts Workshop:

3 days of indoor sessions and outdoor experiences

for landowners who want to enhance their woodlands for wildlife

Using sound ecological principles, this 3-day workshop focuses on actions you can take to enhance your land's wildlife abundance and diversity.

- We'll get you on the land to show you how management can make a difference.
- You'll learn how you can improve wildlife habitat and benefit financially from your land.
- We'll give you a binder stuffed full of literature and other resources to manage your woodlands.
- You'll find out who to contact for your woodland wildlife needs: private, state, and university forestry and wildlife specialists.

A Cooperative Program:

In exchange for the free, 3-day workshop and materials, participants agree to become **COVERTS COOPERATORS**, sharing what they have learned with their communities.

Cooperators agree to...

- develop a sound wildlife management plan for their land.
- reach out and motivate other woodland owners in their community, and be available to answer questions.
- Maintain/share a set of reference materials (provided by the Coverts Project).

You CAN make a difference in your land's wildlife abundance and diversity

And it's one of the most rewarding time investments you can make

Comments from Wisconsin landowners:

Since 1994, 505 landowners have become COVERTS COOPERATORS. Collectively they have influenced the management on over 795,000 acres of land.

"A great experience - I wish I had had the benefit 20 years ago."

"Thanks for a job well done! I was very pleased with the program. I didn't think there were so many people who share my enjoyment in woodland management. Now I realize that we are a powerful group."

"This is an excellent outreach program. Private woodland owners must be involved and this program can provide the means."

When is The Wisconsin Coverts Project Workshop?

Held annually on a weekend in August from Thursday (starting at 6pm) through Sunday (ending at 12:00pm).

What does it cost?

Nothing, it's free. Lodging, meals, and materials are paid for by workshop sponsors.

Who can attend?

Any woodland owner or person responsible for managing a parcel of wooded land in Wisconsin or the Midwest region is eligible to apply. There is no minimum acreage requirement; we are most interested in persons with outreach potential/influence in their community.

We are looking for people who...

- can find time in their busy schedules for the workshop and some outreach activities in their communities.
- would like their woodlands to be healthy and productive.
- care about Wisconsin's woodlands and the wildlife that live within them.

Where is the Wisconsin Coverts Project Workshop held?

The program has been held at various locations in the past, but most recent workshops have been held at the University of Wisconsin's Kemp Natural Resources Station in Woodruff, WI.

Located in Oneida County, Kemp's 135 acres support some of the last old-growth forests

in the Lake states. The station provides opportunities for natural resources research, instruction and outreach amidst the lakes and forests of northern WI.

The boathouse serves as the indoor classroom with state-of-the-art equipment.

Attendees stay in a lodge overlooking Lake Tomahawk.
